

Emotional Logic Award for Schools

Emotional Logic is a programme designed to improve emotional literacy and reduce depression and anxiety. This training is intended to enable school staff to deliver basic Emotional Logic teaching to class groups or individuals.

This course takes place over 2 terms with 4 taught days, some online support sessions and a number of independent study hours.

This is a two-term programme of study and practical activity which will equip a member of school staff to be able to deliver the Emotional Logic Lesson Plan training within their school or setting and to carry out 1:1 Emotional Logic sessions with pupils, carers or colleagues.

Throughout the training, and once qualified, a person holding the Award in Emotional Logic is able to access supervision from a senior Emotional Logic practitioner.

The Award is suitable for school staff with pastoral or behavioural responsibility. It is also suitable for school governors who have a statutory duty for the wellbeing of the staff in their schools and for other professionals working with children and young people.
